# MVP of Customer Segmentation Classification:

This folder consists of a review of the project's first version.

The initial steps in detail are provided in the Jupyter FinalProject. The data explored in addition to the EDA phase is done.

The following is a summary of the MVP notebook:

Cleaning and Explore the data, Drop any unnecessary columns, and handling the missing values to prepare the data for EDA phases

The following figure from EDA (data visualizations):

Note: There is more step to complete the project by using different models to classify the Segmentation
